OPTION ONE: PUBLISH TO KNOWN ONLINE EVENT PLATFORMS AND OPTIMIZE YOUR WEBSITE EVENT LISTINGS

The **Visit Oak Grove, KY Events Calendar** aggregates event listings from a variety of trusted online sources. Marketing your event through visitoakgroveky.com starts with publishing your event on a search-engine-optimized website so it can be discovered, indexed, and shared.

WHY SEARCH ENGINE OPTIMIZATION (SEO) MATTERS?

Aside from allowing your event to be discovered by the Visit Oak Grove, KY Events Calendar, search engine optimization for your business website helps bring quality organic traffic.

There are three options to make your events eligible to appear on Google's search results, according to Google Event Experience:

1. If you use a third-party website to post events (e.g., ticketing sites, online event platforms, or social platforms), check whether your event publisher is already participating in Google's event search experience, as most are. If your event publisher is integrated with Google, continue to post your events on the third-party website.
2. If you use a Content Management System (CMS), such as WordPress, check whether there's a plugin that can add structured data to your site for you. Alternatively, you can use the Data Highlighter to tell Google about your events without editing the HTML of your site.
3. If you're comfortable editing your HTML, use structured data to directly integrate with Google. You'll need to edit the event pages' HTML.

PRO TIP: Ensure each event on your website has a unique URL so Google can properly discover it. Include complete event details—such as date, time, location, ticket information, links, and a promotional image—to improve visibility and search performance.
